

	LEARNING OUTCOMES / COMPETENCIES		
А.			
	1. Basic clinical skills		
	2. The organization and management of the patient and the patient care		
	3. The organization and the management of health care delivery services / system		
	4. Health promotion and disease prevention		
В.	Medical Knowledge and Evidence-Based Medicine		
	5. Appropriate information retrieval and management skills		
	 The integration of knowledge, critical thinking and evidence-based decision making Scientific methods and basic research skills 		
C.	Professional Attitudes and Values		
	8. Communication skills and effective communication with patients / patient relatives		
	 Interpersonal relationships and team working Ethical and professional values, responsibilities 		
	11. Individual, social and cultural values and responsibilities		
	12. Reflective practice and continuing development		
	13. Healthcare delivery systems, management and community-oriented health care		
	14. Education and counseling		
	PHASE-1 LEARNING OBJECTIVES		
1. l	Understanding the normal structures and functions of human body		
	Correlating the basic concepts and principles to each other that define health and disease; applying basic concepts and		
	nciples to health and disease conditions		
	Developing clinical problem solving, clinical reasoning and evaluation skills by integrating biomedical, clinical, social and manities knowledge		
	Gaining basic clinical skills by applications in simulated settings.		
	Awareness of the professional values in health and disease processes (professional, individual, societal) and acquisition		
	cessary related skills Evaluating critically and synthesizing all the medical evidence and perform respecting scientific, professional and ethical		
	lues		
	Acquisition skills in reflective thinking and practicing, being open to continuous individual / professional development.

PHASES – 1 THEMA/ORGAN SYSTEM-BASED COURSE PROGRAMS Year 1, Course 1: Introduction to Cell and Cellular Replication Year 1, Course 2: Cellular Metabolism and Transport Year 1, Course 3: Development and Organization of Human Body Year 1, Course 4: Introduction to Nervous System and Human Behavior Year 2, Course 1: Cell and Tissue Injury I Year 2, Course 2: Cell and Tissue Injury II Year 2, Course 3: Hematopoietic System and Related Disorders Year 2, Course 4: Musculoskeletal, Integumentary Systems and Related Disorders Year 3, Course 1: Cardiovascular System and Related Disorders Year 3, Course 2: Gastrointestinal System, Metabolism and Related Disorders Year 3, Course 3: Nervous System and Related Disorders Year 3, Course 3: Nervous System and Related Disorders Year 3, Course 4: Nervous System and Related Disorders Year 3, Course 4: Nervous System and Related Disorders Year 3, Course 4: Growth Development Mental Health and Related Disorders			

Year 3, Course4: Growth, Development, Mental Health and Related Disorders Year 3, Course 5: Urinary and Reproductive System and Related Disorders

AIM and LEARNING	AIM and LEARNING OBJECTIVES of COURSE			
 Aim: At the end of this committee, second year students will gain knowledge about the development, structure at physiology of the respiratory system and pathogenesis of the disorders related to system. They will also gain knowledge about the signs and symptoms of pulmonary diseases, related risk factors, prevention, diagnosis, and principles treatment. Learning Objectives: At the end of this committee, second year students will, review the development and histology of the respiratory system describe the mechanism of breathing and identify the movement, solubility and transport of gas molecules understand the factors impairing the normal function of the respiratory system and their pathological reflections on the occurrence of the disease gain knowledge about microorganisms that affect the respiratory system and respiratory tract infections gain knowledge about the risk groups, risk factors related to pulmonary diseases and preventive measures gain knowledge about the major signs and symptoms of the pulmonary diseases gain knowledge about the approach to diagnosis, and principles of treatment in pulmonary diseases 				
 comprehend the hazards of smoking define the pharmacotherapy of pulmonary diseases acquire skills necessary to perform experimental application 	ons			
ASSESSMENT SYSTEM Module examination: Written exam at the end of the course, is done both oral built of course and performance during the module Practical examination: Practical exams at the end of course Course examination: Written exam at the end of course Course examination: Written exam at the end of the course at the end of course Course examination: Written exam at the end of the examination the end of the course at the end of the cours
