

	LEARNING OUTCOMES / COMPETENCIES
A.	Clinical Care: Qualified patient care and community oriented health care
	1. Basic clinical skills
	 The organization and management of the patient and the patient care The organization and the management of health care delivery services / system
	 He of ganzation and the management of health care derivery services / system Health promotion and disease prevention
В.	Medical Knowledge and Evidence-Based Medicine 5. Appropriate information retrieval and management skills
	 The integration of knowledge, critical thinking and evidence-based decision making
	 Scientific methods and basic research skills
2.	Professional Attitudes and Values
	8. Communication skills and effective communication with patients / patient relatives
	9. Interpersonal relationships and team working
	10. Ethical and professional values, responsibilities
	 Individual, social and cultural values and responsibilities Reflective practice and continuing development
	 Reflective practice and continuing development Healthcare delivery systems, management and community oriented health care
	14. Education and counseling
	PHASE-1 LEARNING OBJECTIVES
L.	Understanding the normal structures and functions of human body
2.	Correlating the basic concepts and principles to each other that define health and disease; applying basic
	concepts and principles to health and disease conditions
3.	Developing clinical problem solving, clinical reasoning and evaluation skills by integrating biomedical, clinical
_	social and humanities knowledge
I.	Gaining basic clinical skills by applications in simulated settings.
5.	Awareness of the professional values in health and disease processes (professional, individual, societal) and acquisition necessary related skills
5.	Evaluating critically and synthesizing all the medical evidence and perform respecting scientific, professional and
	ethical values
7.	Acquisition skills in reflective thinking and practicing, being open to continuous individual / professiona development.
	PHASES – 1 THEMA/ORGAN SYSTEM-BASED COURSE PROGRAMS
	Year 1, Course 1: Introduction to Cell and Cellular Replication
	Year 1, Course 2: Cellular Metabolism and Transport
	Year 1, Course 3: Development and Organization of Human Body
	Year 1, Course 4: Introduction to Nervous System and Human Behavior
	Year 2, Course 1: Cell and Tissue Injury I
	Year 2, Course 2: Cell and Tissue Injury II
	Year 2, Course 3: Hematopoietic System and Related Disorders
	Year 2, Course 4: Musculoskeletal, Integumentary Systems and Related Disorders
	Year 2, Course 5: Respiratory System and Related Disorders
	Year 3, Course 1: Cardiovascular System and Related Disorders
	Year 3, Course 2: Gastrointestinal System, Metabolism and Related Disorders
	Year 3, Course 3: Nervous System and Related Disorders
	Year 3, Course 4: Growth, Development, Mental Health and Related Disorders
	Year 3, Course 5: Urinary and Reproductive System and Related Disorders

URINARY AND REPRODUCTIVE SYSTEM AND RELATED DISORDERS

AIM and LEARNING OBJECTIVES of COURSE

Aim: At the end of this committee, third year students will gain knowledge about the development, structure and physiology of the urinary and reproductive system and pathogenesis of the disorders related to this system. They will also gain knowledge about the signs and symptoms of urinary and reproductive system disorders, related risk factors, prevention, diagnosis and principles of treatment.

Learning Objectives: At the end of this course, third year students will,

- review the development, histology and physiology of the urinary system,
- review the development, histology and physiology of male and female reproductive systems,
- define the pathologic processes in urinary and reproductive system disorders, gain knowledge about microorganisms that affect the genitourinary system and associated infections,
- gain knowledge about the risk factors related to genitourinary system disorders, gain knowledge about the signs and symptoms of these disorders,
- gain knowledge about the prevention of genitourinary system disorders, approach to diagnosis, principles of treatment,
 - define the major concepts of reproductive health, including family planning and safemotherhood.

ASSESSMENT SYSTEM Module examination: Written exam at the end of the course and performance during the module Practical examination: Practical exams at the end of course Course examination: Written exam at the end of course	PROGRAM EVALUATION Evaluation at the end of the course, is done both orally and by using structured evaluation forms

READING / STUDYING MATERIALS

- Clinical Gynecologic Endocrinology and Infertility; Speroff & Fritz
- Human Embryology; W.J. Larsen The Developing Human; K. Moore Histology; a Text and Atlas
- Human Histology; A. Stevens, J. Lowe
- Pocket Companion to Brenner and Rector's The Kidney; Michael R. Clarkson and Barry M. Brenner.
- Medical Physics & physiological measurement; B.H. Broson and R.H. Smalleroad Scientific
- Americans 205(1) 56-64 (1961)
- Physics for the Health Sciences; C. Nave and B. Nave
- Principles of Physical Chemistry with Applications to the Biological Sciences; D. Freifelder
- Pathologic Basis of Disease; Kumar, Abbas, Fausto, 7th ed.
- Pathology; E. Rubin, J.L. Farber, 3rd ed. Pathology; A. Stevens, J. Lowe.
