

#### **LEARNING OUTCOMES / COMPETENCIES** A. Clinical Care: Qualified patient care and community-oriented health care 1. Basic clinical skills 2. The organization and management of the patient and the patient care 3. The organization and the management of health care delivery services / system 4. Health promotion and disease prevention B. Medical Knowledge and Evidence-Based Medicine 5. Appropriate information retrieval and management skills 6. The integration of knowledge, critical thinking and evidence-based decision making 7. Scientific methods and basic research skills C. Professional Attitudes and Values 8. Communication skills and effective communication with patients / patient relatives 9. Interpersonal relationships and team working 10. Ethical and professional values, responsibilities 11. Individual, social and cultural values and responsibilities 12. Reflective practice and continuing development 13. Healthcare delivery systems, management and community-oriented health care 14. Education and counseling PHASE-1 LEARNING OBJECTIVES 1. Understanding the normal structures and functions of human body 2. Correlating the basic concepts and principles to each other that define health and disease; applying basic concepts and principles to health and disease conditions 3. Developing clinical problem solving, clinical reasoning and evaluation skills by integrating biomedical, clinical, social and humanities knowledge 4. Gaining basic clinical skills by applications in simulated settings. 5. Awareness of the professional values in health and disease processes (professional, individual, societal) and acquisition necessary related skills 6. Evaluating critically and synthesizing all the medical evidence and perform respecting scientific, professional and ethical values 7. Acquisition skills in reflective thinking and practicing, being open to continuous individual / professional development. PHASES – 1 THEMA/ORGAN SYSTEM-BASED COURSE PROGRAMS Year 1, Course 1: Introduction to Cell and Cellular Replication Year 1, Course 2: Cellular Metabolism and Transport Year 1, Course 3: Development and Organization of Human Body Year 1, Course 4: Introduction to Nervous System and Human Behavior Year 2, Course 1: Cell and Tissue Injury I Year 2, Course 2: Cell and Tissue Injury II Year 2, Course 3: Hematopoietic System and Related Disorders Year 2, Course 4: Musculoskeletal, Integumentary Systems and Related Disorders Year 2, Course 5: Respiratory System and Related Disorders Year 3, Course 1: Cardiovascular System and Related Disorders Year 3, Course 2: Gastrointestinal System, Metabolism and Related Disorders

Year 3, Course 3: Nervous System and Related Disorders

Year 3, Course: Growth, Development, Mental Health and Related Disorders

Year 3, Course 5: Urinary and Reproductive System and Related Disorders

#### HEMATOPOIETIC SYSTEM AND RELATED DISORDERS

#### AIM and LEARNING OBJECTIVES of COURSE

**Aim:** At the end of this committee, second year students will gain knowledge about the development, structure and physiology of the hematopoietic system and pathogenesis of the disorders related to system. They will also gain knowledge about the signs and symptoms of hematopoietic disorders, related risk factors, prevention, diagnosis, and principles of treatment.

Learning Objectives: At the end of this committee, second year students will,

- 1. Understand the development and histology of the lymphoid organs and blood
- 2. Identify the structure and function of the hematopoietic system
- 3. Define the pathologic processes in hematological disorders
- 4. Gain knowledge about microorganisms affect the hematopoietic system and their pathogenesis in infectious process
- 5. Gain knowledge about the risk groups, risk factors related to hematological disorders and preventive measures
- 6. Gain knowledge about the signs and symptoms of these disorders
- 7. Gain knowledge about the approach to diagnosis, and principles of treatment in hematological disorders
- 8. Define the pharmacotherapy of hematological disorders
- 9. Acquire skills necessary to perform experimental applications.

ASSESSMENT SYSTEM Module examination: Written exam at the end of the course and performance during the module Practical examination: Practical exams at the end of course Course examination: Written exam at the end of course	<b>PROGRAM EVALUATION</b> Evaluation at the end of the course, is done both orally and by using structured evaluation forms.
