LEARNING OUTCOMES / COMPETENCIES

A. **Clinical Care: Qualified patient care and community-oriented health care**
   1. Basic clinical skills
   2. The organization and management of the patient and the patient care
   3. The organization and the management of health care delivery services / system
   4. Health promotion and disease prevention

B. **Medical Knowledge and Evidence-Based Medicine**
   5. Appropriate information retrieval and management skills
   6. The integration of knowledge, critical thinking and evidence-based decision making
   7. Scientific methods and basic research skills

C. **Professional Attitudes and Values**
   8. Communication skills and effective communication with patients / patient relatives
   9. Interpersonal relationships and team working
   10. Ethical and professional values, responsibilities
   11. Individual, social and cultural values and responsibilities
   12. Reflective practice and continuing development
   13. Healthcare delivery systems, management and community-oriented health care
   14. Education and counseling

PHASE-1 LEARNING OBJECTIVES

1. Understanding the normal structures and functions of human body
2. Correlating the basic concepts and principles to each other that define health and disease; applying basic concepts and principles to health and disease conditions
3. Developing clinical problem solving, clinical reasoning and evaluation skills by integrating biomedical, clinical, social and humanities knowledge
4. Gaining basic clinical skills by applications in simulated settings.
5. Awareness of the professional values in health and disease processes (professional, individual, societal) and acquisition necessary related skills
6. Evaluating critically and synthesizing all the medical evidence and perform respecting scientific, professional and ethical values
7. Acquisition skills in reflective thinking and practicing, being open to continuous individual / professional development.

PHASES – 1 THEMA/ORGAN SYSTEM-BASED COURSE PROGRAMS

Year 1, Course 1: Introduction to Cell and Cellular Replication
Year 1, Course 2: Cellular Metabolism and Transport
Year 1, Course 3: Development and Organization of Human Body
Year 1, Course 4: Introduction to Nervous System and Human Behavior
Year 2, Course 1: Cell and Tissue Injury I

Year 2, Course 2: Cell and Tissue Injury II

Year 2, Course 3: Hematopoietic System and Related Disorders
Year 2, Course 4: Musculoskeletal, Integumentary Systems and Related Disorders
Year 2, Course 5: Respiratory System and Related Disorders
Year 3, Course 1: Cardiovascular System and Related Disorders
Year 3, Course 2: Gastrointestinal System, Metabolism and Related Disorders
Year 3, Course 3: Nervous System and Related Disorders
Year 3, Course: Growth, Development, Mental Health and Related Disorders
Year 3, Course 5: Urinary and Reproductive System and Related Disorders

CELL AND TISSUE INJURY - II

AIM and LEARNING OBJECTIVES of COURSE

Aim: At the end of this course, second year students will be able to broaden their basic science knowledge to understand how certain alterations in bodily processes may manifest as disease and gain fundamental knowledge about the processes underlying human diseases, as the scientific foundation for developing clinical skills.

Learning Objectives: At the end of this course, second year students will,

1. describe using proper nomenclature, the etiology, pathogenesis, structural and functional changes at cellular and tissue level;
2. describe in detail what happens to cells and tissues in response to abnormal stimuli;
3. explain the basic principles of human immune system as it relates to defense against disease (innate, humoral, cell mediated);
4. describe the principles of classifying infectious microorganisms and their pathogenic properties;
5. gain knowledge about bacteria and bacterial pathogenesis;
6. gain knowledge about fungi and pathogenesis of fungal diseases;
7. identify major drug classes and prototype drug(s) for each class.

ASSESSMENT SYSTEM	PROGRAM EVALUATION
Module examination: Written exam at the end of the course, performance during the module and reports for the modules. **Practical examination:** Practical exams at the end of course **Course examination:** Written exam at the end of course	Evaluation at the end of the course, is done both orally and by using structured evaluation forms.

DEPARTMENTS PARTICIPATING IN COURSE-2.2

- Biochemistry
- Immunology
- Microbiology
- Pathology
- Pharmacology
- Public Health
