INTRODUCTION TO CELL AND CELLULAR REPLICATION	
AIM and LEARNING OBJECTIVES of COURSE Aim: At the end of this committee, first year students will gain knowledge about structure, function and mechanisms in human biology at the molecular and cellular levels with a specific emphasis on cellular replication and genetics. Learning Objectives: At the end of this committee, students will, - Identify and describe the development, structure and function of cell and its subcomponents - Evaluate the biochemical process of the cell - Understand cell division process and related mechanisms - Describe the genetics mechanisms and protein biosynthesis - Understand genetic variation in individuals - Describe the molecular mechanisms of genetic inheritance and genetic basis of inherited disease - Acquire skills necessary to perform experimental applications	
ASSESSMENT SYSTEM Module examination: Written exam at the end of the course, performance during the module and reports for the modules. Practical examination: Practical exams at the end of course Course examination: Written exam at the end of course	PROGRAM EVALUATION Evaluation at the end of the course, is done both orally and by using structured evaluation forms
